

CROSSING THE FINISH LINE: TRENDS IN DEGREE COMPLETIONS OVER THE PAST DECADE (2000-2010)

Total annual completions show the number of students who have earned a degree or certificate in a given year. From 2000 to 2010, the total number of students earning Certificates, Associate's Degrees, or Bachelor's Degrees at Boston/Metro North institutions increased, both in private and public institutions. While the annual growth rate in Associate's and Bachelor's Degree completions were strongest at public institutions, growth in Certificates was strongest at private institutions. Despite growth in all categories and institution types, the region lagged behind both Massachusetts and the United States in the growth of total degree comple-

tions for almost every type of degree. Bachelor's Degree completions were the exception, with an annual growth rate (2.3 percent) slightly exceeding the Massachusetts growth rate (2.1 percent) but trailing that of the United States (2.9 percent).

Source: National Center for Education Statistics, Integrated Post Secondary Education Data System.

Note: Degree completions are for those students who completed degrees at institutions within the defined geography. The students may not actually live in the region. Completion totals are based on degrees completed in an academic year. For example, 2010 completions represent degrees completed in the 2009-2010 academic year.
